

# Artemyde F1

Early maturing

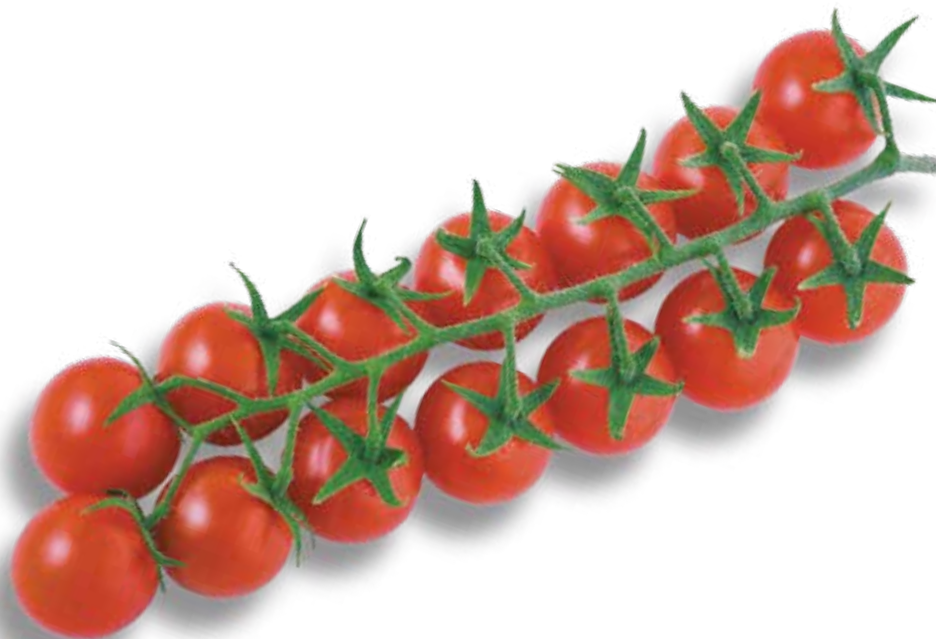

HR: ToMV; Fol 0, 1.  
IR: TYLCV; Ma, Mi, Mj

22-24 g

32-34 mm

Red cherry tomato variety, indeterminate. Strong red in colour, weight 22-24 gr. , good resistance against cracking and a lasting shelf life (LSL). In springtime full growth fruits don't show any yellow halo on them. It is strongly characterized by a fine taste typical of Mediterranean and graceful elongate-shaped cluster (herringboned) with thick rachis fat sepals. Artemyde F1 is a very rustic plant with medium stamina. It is characterized by short internodes. It's a highly productive plant and it maintains a luxuriant blossoming even in the upper part. Finally, it perfectly adapts to long crop cultivation and transplanting in autumn and winter.
