22-24 g

32-34 mm

Cherry tomato for red bunch harvesting.

The bunch is in a herringbone pattern, it is very uniform and elongated, elegant and with thick rachis and fleshy sepals of a strong and persistent green color. Intense and bright red, it has an average weight of 22-24 g and excellent shelf life in post harvest (Long Shelf Life), definitely among the highest on the market. Crack resistance is also exceptional. Taste and high Mediterranean taste.

The plant is very rustic and it has a medium vigor, with short trunk gap, it proves to be highly productive and it maintains an excellent flowering in the apical part even with high temperatures. It is adapted properly to crops with spring and summer transplantation.
