

Segesta F1

Earling maturing

HR: Fom 0, 1, 2.
IR: Px 1, 2; Gc 1; MNSV

2-3 Kg

Variety of yellow melon, the shape is wrinkled and round-oval, with a weight of 2-3 kg. It is characterized by a uniformity of the marketable fruit, and has a reduced cavity. It has also a very crispy white flesh, with an excellent flavor and high sugar content. It is characterized by a maximum of quality in its market segment and a high post-harvest shelf life. Plant with medium vigor when ripe concentrated, it is very rustic, with high tolerance to powdery mildew. It shows abundant flowering even under difficult conditions, and it is very productive. Finally, it bears well the crops with low available water supply and it is tolerant to the virus MNSV.
