160 g.

5 x 10 cm

Indefinite tomato from greenhouse and height field (awnings online), of the type San Marzano for harvest to green / red cluster and/or single fruit. Of intense green colour without collar (UG), with weight 160 g. around, 5 cm of diameter and 10 cm of length. A lot of uniform and of colour to red intense and bright, you/he/she is characterized by an excellent Long Shelf Life in picked post, to the maximum levels of market. Introduces an elevated resistance to the rottenness apical and a Mediterranean taste typical of the typology san Marzano. Of tall middle vigour, airy parochial and with short and regular internodes also in the tall stages. Very rustic, he suits well for the autumn transplantations and the long cycle of the Sicilian crops. Raised productivity to the maximum levels of market.
